USE CASE DIAGRAM

Draw the use-case diagram for the case given below:

Consider a bus firm in which ticket selling can be done from the branches by staff and customers through the internet. It is possible for users to list available voyages and see the voyage details if they want; they can also make reservation, purchase the ticket and cancel the reservation. To make, purchase and cancel the reservation the users must be logon the system. The bus firm has many branches in Turkey and each branch has a manager. In each branch the managers can create the daily purchase reports of their own branch to do that they need to login to the system. The company owner of the bus firm has the ability to display and print the reports produced in each branch.
